## Ease of Use

Workplace oral fluid/saliva drug testing is a modern way of testing for drugs in the system.

To ensure compliance with the relevant Australian Standard and industry best practice, CMM Technology have developed an 'A & B Sample Kit' for the division of oral fluid specimens to be sent to the laboratory.

This is a simple method of splitting the oral fluid sample to remain compliant with AS4760.

The kit is comprised of;

- ◆ Collection sponge,
- ◆ Collection containers
- ◆ Seals
- ◆ Ice pack
- ◆ Dessiccant
- ◆ IATA bag
- ◆ Protection bag
- ◆ Shipping satchel

In fact everything you need to split the sample ready for dispatch to the laboratory.
